| 24                          | ZTM-Docisk_2-R250.2.6.1                      | 2                  | 4H13          |

## 2. Parameters

A detailed description of the subject matter of the contract in the form of a set of drawings is attached hereto. Executive drawings in electronic form (2D drawings and 3D models) will be made available to Contractors after signing of the Confidentiality Agreement.

## 3. Additional conditions related to the subject matter of the contract.

- a. The items are to be made in accordance with the documentation provided.
- b. Elements are to be made within the specified tolerances. If there are non-tolerated dimensions on the drawing and there is no relevant information then they are to be made to a tolerance of +/- 0.1mm.
- c. Elements are to be made of the materials indicated in the drawing tables.
- d. The quantity of elements required for fabrication is in the Quantity column.
- e. All items delivered to the purchaser's premises are to be washed, degreased. They must not contain any chips and burrs, dents or other surface defects.
- f. All items are to be segregated, packaged so that they are not damaged during transport and storage, with particular attention to polished items.
